PLEASE TAKE TIME TO CONSIDER THE FOLLOWING IMPORTANT POINTS

INSTALLATION of kronoLoc™ Floors

Fully detailed installation instructions are included with every box of kronoLoc™ laminate, but PLEASE take note of special warning about the substructure preparation and what goes under the floor, before you start.

The substructure (floor) must be in good condition, free of damp, flat and smooth. All ground floor installations MUST be fitted with a suitable vapour barrier over the entire floor between the laminate and the substrate. In addition (unless otherwise specified) a 2mm cushion foam layer is also required below the laminate, and most suppliers will offer what is referred to as a combination underlay which incorporates the foam cushion and vapour barrier, all in one.

We strongly recommend the use of our KronoLay™, which is a combination underlay, that ensures that your product guarantee is secure. KronoLay™ is a certified vapour barrier displaying SABS material specification and source. Refer to www.kronoloc.co.za for more information.

MAINTENANCE of kronoLoc™ Floors

Wood laminate flooring is protected by a non porous protective layer on the top surface, which prevents ingress of liquids spilled on the floor. However, the mechanical joint between the panels is not totally waterproof and it is possible for liquid to get into these joints, which can cause swelling and peaking at the edges of the boards. Therefore using the correct cleaning procedure is vitally important, as neither the suppliers nor the manufacturers will be held responsible if incorrect cleaning procedures are adopted.

Maintenance and cleaning of wood laminate is very easy because all it requires is to be swept or vacuumed regularly to split dirt and dust. A micro fiber mop with a very light mist spray of water (with a few drops of vinegar added) works well, as the lightly damp mop head lifts the dust onto the mop, and the vinegar prevents streaking on the floor surface. Heavy or stubborn stains can be removed with a good quality Laminate Floor Cleaner.

There are a few DON'Ts however: Never use water directly on the floor – Never use a conventional wet mop – Never use normal household detergents that contain alcohol, ammonia, wax or oils as they may damage the floor – Never leave spills for a long period of time, dry them up as soon as possible – Never spray excessive amounts of cleaning fluid directly onto the floor, but rather apply onto the cleaning mop head.

Laminated flooring is an investment that adds value to any property and if you employ the services of cleaning staff, PLEASE take time to educate the people responsible for cleaning the floor. PLEASE REFER TO OUR WEB SITE AT www.kronoloc.co.za for more detailed cleaning instructions.

GUARANTEE on kronoLoc™ Floors

The guarantee period for all laminates within the kronoLoc™ Collection is clearly indicated on EVERY box of laminate sold and defined as the guarantee period for Domestic applications. Commercial applications carry a guarantee period of one third of the Domestic rating. (RUBY range is 18 years for Domestic applications, so it is 6 years for Light Duty Commercial applications). Please refer to our web site www.kronoloc.co.za for full details of the terms of the guarantee or email info@kronoloc.co.za

RUBY™

TANZANITE™

DIAMOND™

AQUAMARINE™
TANZANITE™ is a sophisticated colour combination intended for all domestic and medium duty commercial applications. The AC4 Class 32 rating guarantees a tough long lasting floor which is ideal for modern living. One colour is the square edge and the other five are full V4 grooved boards which enhance the look and feel of any floor.

RUBY™ is the favourite GEM as it oozes with charm and elegance at an affordable price. This easy to maintain floor covering is tough and hard wearing in all domestic applications. The RUBY range was selected with colours to appeal to all tastes; two colours are the smooth square edge finish whilst the other six offer full V grooves to all four sides.

**Package Unit:** 8 panels per box
